

Travelling redefined

TRAVELLING has been gaining popularity in recent years. People, unlike before, travel to places either in the country or outside whenever they get holidays. As almost everything is going digital right now, everyone wants everything on their fingertips. Earlier, Bangladesh lacked a website that could give a complete picture about travelling details inside the country. At present, there are few websites to provide details of travel attractions in Bangladesh. They also provide a wide range of other services from visa processing to hotel booking and a one-stop travel solution for all our travel-related problems.

I have had a pleasant experience of travelling to India after taking consultations from such a website and I am sure their services are worth the money spent after them. They are the first ever online platform in Bangladesh that accepts payment from both local currency through credit cards as well as through mobile financial services like bkash, Rocket etc. to make matters more convenient for you. I am sure there are few others which will furnish us similar travel details. With more sites in the coming future we shall have a revolutionary change in the tourism industry.
