

EAST WEST UNIVERSITY TELECOMMUNICATIONS CLUB

SM ABDUL AWAL

East West University Telecommunications Club (EWUTC) was established in early 2006 by a group of enthusiastic students to spread telecommunication related ideas among students. The club's primary goal is to help the students become familiar with innovative ideas related to telecommunications after they take academic lessons in classrooms. The club helps students understand the practicality of what they learn from their books theoretically. EWUTC was formed under the supervision of the department of Electronics and Communications

Since its inception, EWUTC has organised numerous workshops and seminars as a part of its regular practice for knowledge dissemination process and these were often conducted by eminent telecom experts of the industry. The club has also taken students on field trips to the various industries where they had a chance to see the practical applications of what they learn in classes being put to regular use. In addition, the club organises non-academic activities such as picnics and excursions. In the six years of EWUTC, a vigorous number of workshops such as workshop on engineering software for

Currently EWUTC members are creating an impression in the industries and are making the club proud. EWUTC contributes linking the students to their industry. Recently, EWUTC hosted the national level programme, "TELCO WARFARE", for the students of universities and colleges. In its first episode, TELCO WARFARE 2012, which took place on September 13 - 14, EWUTC arranged four categories of competitions titled 'TELE WAR' - Telecom Quiz, 'NET WAR' - Networking Contest, 'APPS WAR' - Mobile Apps Making Contest and 'Q WAR' - College Level Quiz. East

Engineering of East West University. Faculty members, Sarwar Jahan and M Rakibul Hasan, department of ECE, were the founder moderators. EWUTC is a student run club where an executive committee is selected for a year under the coordination of club moderators.

fresher students, workshop on Packet Tracer, Linux, Mikrotic, Multiprotocol Label Switching (MPLS), and Radio Planning and Optimisation have been organised. EWUTC has arranged different seminars on contemporary issues regarding both technological and economic aspects of telecommunications.

West University won the "TELCO WARFARE 2012" and was titled "TELECHAMP". ■
