Seminar & Workshop of EWU Agro-Industrialization Club

AS MANY AS 19 students club is functioning in East West University (EWU) giving the students a taste of practical knowledge and experience beyond academic books. The Agro-Industrialization Club is the first agro-based club in the private universities which started its journey on April 01, 2011 with the slogan "Enlightening the world with the color of Agriculture".

Recently four EWU students with an abiding inter-

est in agriculture joined a program titled 'Firey Chol Matir Taney' of Channel-I. The vision of this club is to facilitate a platform to students so that they can get acquainted with the diverse aspects of agriculture and contribute in this sector. In this respect, the club organizes seminars and workshops for building skills of the students and for creating awareness.

So far the club organized a seminar titled "Tilapia: a Golden Key of Career" and a workshop on "Enhancing

agricultural development through social media" at the EWU campus. Besides, for a field level experience, an outdoor workshop on "Technology and agriculture: Bridge to a new possibility" was organized in Manikgonj. Recently, an exhibition and seminar on "Agro exposition and idea sharing" was held on EWU campus. The purpose of this event was to enrich students' knowledge about participating in an organization and as well as motivating them to build agro-based in-

dustries along with developing themselves as successful entrepreneurs in the future.

Through these activities students will be able to contribute in the agricultural sector as well as the economy of Bangladesh. Furthermore as a student and member of the club, we have learned that as a citizen of Bangladesh it is our responsibility to use our innovative and creative skills for the welfare of our beloved nation.
